

SEAN MCRAE

AI/ML Product Manager | GenAI, Agentic Search & SaaS Platforms

Toronto, ON, Canada | seanmcrae6@outlook.com | linkedin.com/in/seanmcrae6 | seanmcrae.github.io | Legally authorized to work in Canada

PROFESSIONAL SUMMARY

AI/ML Product Manager with 10+ years taking products from legacy to AI-native. Rebuilt a keyword search product into an agentic enterprise search platform with vertical workflows for Legal, Healthtech, Fintech and US Government, during a period of ARR growth from \$5M to \$23M. Brings deep technical fluency across LLMs, RAG, ML ranking, cloud and APIs, plus a commercial lens on pricing, packaging and go-to-market. Known for fixing business fundamentals before reaching for AI, and for aligning engineering, data, compliance, sales and executives around one clear direction.

CORE CAPABILITIES

Product Strategy & Roadmapping • AI / GenAI, RAG & Agentic Products • ML Ranking & Predictive Analytics • Technical Product Management • Customer Discovery & Research • Pricing, Packaging & GTM • Product-Led Growth • Backlog Ownership & Prioritization • Requirements, Epics & User Stories • APIs, Integrations & Data Models • Launch & Release Readiness • Product KPIs: Revenue, Retention, Adoption, CSAT • Stakeholder & Executive Communication • Agile / Scrum Delivery

PROFESSIONAL EXPERIENCE

Product Advisor | Fascia Labs / Jun 2025 – Present

- Advise B2B companies on turning operational friction into AI-driven, optimized workflows.
- Diagnose workflow, data and process fundamentals first, then prescribe AI only where it moves a business outcome, steering clients away from tool-first spending.
- Translate findings into product roadmaps, workflow designs and adoption plans that client teams can own and execute.

Product Manager, GenAI & ML | Upland Software / Apr 2024 – Jun 2025

- Rebuilt a pure keyword search product into AI search, then into an agentic search platform with actionable workflows tailored for Legal, Healthtech, Fintech and US Government customers.
- Cut search latency by 65% by partnering with engineering on retrieval, model and infrastructure trade-offs.
- Drove the product through a period of ARR growth from \$5M to \$23M, owning roadmap, pricing strategy, SKU updates and vertical GTM positioning.
- Introduced an AI evaluation framework to track answer quality, accuracy, latency and LLM cost-to-serve as usage scaled.
- Ran customer and partner advisory sessions to validate vertical needs, surface adoption blockers and prioritize by customer value and feasibility.
- Shipped end to end across discovery, epics, sprint planning, demos, release readiness, sales enablement and launch narratives.

Technical Product Manager, AI & ML | Canaccede Financial / Jan 2021 – Mar 2024

- Spearheaded an ML-powered debt-recovery ranking that scored debtors on ability to repay, so recovery agencies could work the most promising accounts first.
- Embedded predictive models into billing, credit risk, reporting and resource-allocation workflows on a business-critical system of record.
- Steered a microservices migration that improved platform reliability and API performance while protecting core financial operations.
- Managed a 15-person agile team through roadmap planning, sprint execution, demos, release coordination and continuous delivery.
- Turned complex business rules, data models and compliance constraints into clear priorities with engineering, operations, compliance, finance and executives.

Director of Product Management | CTO Bees Inc. (formerly Data Naya) / *Aug 2017 – May 2020*

- Guided clients across multiple verticals to adopt product-led growth, backed by data engineering and data science capabilities.
- Directed product strategy for enterprise analytics and workflow automation across resource forecasting, time capture, billing and capacity planning.
- Pivoted the analytics offering toward AI-powered insights and delivered 15+ custom analytics and automation solutions for enterprise clients.
- Built and ran cross-functional product and engineering teams, and planned cloud migration and cost optimization across AWS, Azure and GCP.

Technical Consultant, SaaS Products | Naaga Digital / *May 2012 – Jul 2017*

- Delivered SaaS, workflow automation, analytics and cloud migration projects for enterprise clients.
- Designed scalable APIs and microservices, and translated business needs into product, data and implementation plans.

TECHNICAL SKILLS & TOOLS

AI/ML: LLMs, RAG, agentic workflows, model evaluation, ML ranking, predictive analytics • Cloud: AWS, Azure, GCP, Docker, Kubernetes • Data: SQL, Python, PostgreSQL, MongoDB, Snowflake, Tableau, Google Analytics • APIs: REST, microservices, Postman • Product: Jira, Confluence, Productboard, Aha!, Linear, Figma, GitHub, Datadog, Retool, Salesforce

EDUCATION

- Certificate, Computer Science & Machine Learning — Harvard University
- Post-Graduate Certificate, Arts & Culture Management — Humber College
- Post-Graduate Certificate, Project Management — Centennial College

CERTIFICATIONS

Project Management Professional (PMP), PMI • PMI Agile Certified Practitioner (PMI-ACP) • Professional Scrum Product Owner (PSPO), Scrum.org • Certified Scrum Master (CSM), Scrum Alliance • Certified Product Manager (CPM), AIPMM • AI Product Manager Professional Certificate, IBM

AWARDS

- Blue Cape Award, Upland Software (2024): top 1% of employees, for leading the AI search platform launch.
- Best Use of Data in Product Development, Collision Toronto (2023).
- Excellence in Product Leadership Award, Canaccede Financial (2022).
- Outstanding Strategic Vision Award, Data Naya (2020).
